

Accident Scar Treatments

THE SCHEIBNER CENTRE

About treating accident scars with lasers

Accidents are traumatic at the time, but the scars they leave can be a constant reminder and source of pain. The sooner after the accident the scars are treated, the better and more likely they can be fully resolved. Even old thick scars can be reduced to a great degree by laser stimulation, but they can require repeat treatments.

Before and after eternally young laser treatment.

As with surgical scars, the earlier the scar is treated after the accident, the better the results.

Before and after eternally young laser treatment.

Benefits of Eternally Young™ Laser Treatments:

- Dramatically improved healing time compared to resurfacing, dermabrasion and other invasive procedures
- Collagen stimulation triggers skin rejuvenation without tissue loss.
- Overall firming, rejuvenating effect on skin of neck, hands, and face.
- Natural: no artificial collagen injections or overly tight "plastic surgery look".
- Allows skin rejuvenation to body parts that were previously untreatable such as neck and hands.
- Twenty five years successful experience
- Laser treatments can be used to heal:
 - various scars
 - reduce stretchmarks
 - wrinkles
 - large pores
 - acne scars
 - age and sun spots
 - freckles
 - birthmarks
 - broken capillaries (rosacea)
 - sun damage
 - overall skin elasticity, quality, texture and appearance.

• To learn more on aftercare and the metamorphosis of eternally young laser treatments, please come in for a consultation. We can go over the procedure from start to finish and make recommendations for you
