2008 ISSUE 1

Dear Patients

Hope you had a lovely Christmas break and this year brings you only joy, contentment and peace of mind. 2008 marks the 28th year of my helping you lovely people look your best. I am always working on developing new and better treatments and have spent the last 3 years perfecting a number of new ideas.

I am now ready to return to do what I love best – to work in the office again to treat you, your friends and families. So it is with the very best regards that I wish you all a very positive and healthy 2008.

Best wishes,
Dr Adrianna Scheibner

EXCITING NEW DEVELOPMENTS

I have worked very diligently to bring you new, faster and more effective treatments.

I have developed a way of rejuvenating and improving the appearance of complexion without ANY downtime!

The cost of this treatment is \$550 to \$880 per session. Even one or two sessions will produce visible improvement! These are spaced about 3 to 6 months apart. The treatments actually feel pleasant and make-up can be worn straight away.

Energy System in the Body

After a great deal of research, I have also found a way of boosting the energy system in the body. This helps to reverse or at

least improve a wide range of diseases. These include:- Multiple Sclerosis, Parkinson's disease and Rheumatoid arthritis.

This research has shown a marked improvement for those suffering from poor sleep and fatigue. It also relieves pain due to recent or old injuries.

We have observed that any organ in the body which is not in optimal health can be stimulated to regenerate. The treatment has also been observed to boost the immune system in patients with cancer.

For those who love their pets, you will be happy to know that animals respond even better than humans! We have treated many animals as well as people, to ascertain the genuine nature of this treatment. The results are so encouraging and we have been able to help so many people with conditions considered to be untreatable by traditional or mainstream medicine that we feel obliged to offer these treatments as a service to people who really have nowhere else to turn. Therefore the remuneration for this specific treatment is on a voluntary donation basis. The suggested donation is \$20 and the monies go towards further research and development.

It has been widely noted by participants that this particular treatment works best in small groups or 2 or more people. Please check with our office for the schedule for these treatments and please look on our website for more information.

Products

Our skin care products are still the best, as you know and we receive continual positive feedback on their results.

We have not found a better way to keep skin moist and therefore as wrinkle free as possible. Substantial discounts remain available for loyal customers. Please talk to Suzana or look on line.

Dramatic before & after effects from Eternally Young™ Skincare

Hair Care Products

We have added shampoo, conditioner and scalp tonic to go with the hair laser stimulation.

Weight Loss - Without Dieting!

I am very proud to report that my son has just completed his first movie. It is a documentary of how food affects our health and why certain foods make it difficult, if not impossible to lose weight.

The film is called 'A Delicate Balance'- The Truth, and is available on DVD at a cost of \$29.95 plus postage and handling.

Specialised Food

For those with food allergies or for those who just want to be healthy!

We have a wide range of items including:- Gluten free, dairy free and organic. There is a range of tasty savoury and sweet items to choose from. A list of all items available can be found on 'Happy Healthy Foods' website. www.happyandhealthyfoods.com

Hair Growth Stimulation And Regeneration

I have developed a unique, gentle safe and effective means of stimulating new hair to grow and improve the quality of existing hair.

This treatment is able to prevent and reverse hair loss. It is particularly effective with pregnant women and in people who suffer from stress induced hair loss. The treatment also helps reduce and slow down the hair loss in people with a genetic or family pre-disposition to hair loss.

The cost of this treatment, (which also feels pleasant to receive), is \$385 for the first 2 treatments and \$275 thereafter.

People with slight or early hair loss need 1-2 sessions. Moderate hair loss would entail 2-4 sessions. Those with severe losses would require at least 4 sessions and more. Once hair regrowth has occurred, the hair would require treatment once or twice yearly to maintain optimal condition.

Books

Life is a challenge! Sometimes more than we can bear. Like so many of us, I have been through more than my fair share of challenges! Throughout it all, I have learnt how to deal with stress without losing my peace of mind. I would love to share my life experiences with you.

It is with this motivation that I have written my life story called 'On The Wings of Faith'. This paperback is available at a cost of \$33 plus postage and handling.
